

Contents

1	What is an Operations Control System?	9
1.1	Scope and Limits of Operations Control Systems	9
1.2	Users and Beneficiaries of Operations Control Systems	9
1.3	Aims of Operations Control Systems	11
1.4	Economic Considerations	11
1.5	Initial Conclusions	12
2	Fundamental Considerations	14
2.1	Structure of a Modular Integrated Operational Planning and Control System	14
2.2	Typical Control Centres	15
2.3	Mass Transit and Main-line Services	18
2.4	Central, Local and Mobile Operations Control Systems	21
2.5	Resource Management	21
2.6	Preliminary Remarks on Planning	24
2.6.1	Long-term Planning	24
2.6.2	Medium-term Planning	25
2.6.3	Short-term Planning	25
2.6.4	Timetable Concepts and Interfaces to an External Timetable Management System ..	25
2.6.5	Various Timetable Concepts for Main-line and Mass Transit Services	27
3	Higher-level Requirements	29
3.1	System Requirements	29
3.2	System Functions	30
3.3	Access Rights	31
3.4	User Interface	32
3.5	Planning Data	32
3.5.1	Access Code	33
3.5.2	Timetable Contents Independent of the Train Run	33
3.5.3	Station-specific Timetable Contents	33
4	Remote Control Centre / Operator Console	35
4.1	Basic Functionality	38
4.1.1	Detail View	38
4.1.2	Overview	39
4.1.3	Interlocking Operator Control	40
4.1.4	Logging	40
4.1.5	Telecontrol System	41
4.2	Possible Extensions	43
4.2.1	Input Forms in the Remote Control Centre	43
4.2.2	Abstract Geographical View	43
4.2.3	Hardcopy	44
4.2.4	Train Tracking in a Remote Control Centre	44

4.2.5	Automatic Route Call and Fleeting	44
4.2.6	Plausibility Checking of Interlocking Indications	45
4.2.7	Long Routes	46
4.2.8	Route Stores	46
4.2.9	Logbook	47
4.2.10	Reports	48
4.2.11	Bulletin Board	48
4.3	Interfaces	49
4.4	Typical Work in a Remote Control Centre	49
4.4.1	Traffic Observation	49
4.4.2	Traffic Control	50
4.4.3	Documentation	50
4.5	Summary	51
5	Operations Control Centre	52
5.1	Functions Shared with the Remote Control Centre	57
5.2	Basic Functionality	57
5.2.1	Input Forms in the Operations Control Centre	57
5.2.2	Train Management	58
5.2.3	Train Tracking in an Operations Control Centre	59
5.2.4	Timetable Management System in an Operations Control Centre	61
5.2.5	Simplified Editing of the Timetable	62
5.2.6	Automatic Route Setting	62
5.3	Possible Extensions	64
5.3.1	Route Diagram	64
5.3.2	Dynamic Timetable User Interface (Matrix)	64
5.3.3	Automatic Conflict Resolution based on Timetable Specifications	65
5.3.4	Automatic Conflict Resolution	66
5.3.5	Creation and Cancellation of Access Restrictions	66
5.3.6	Tracking and Management of Locomotives, Train Crews, Rolling Stock	67
5.3.7	Depot Management	68
5.3.8	Dynamic Passenger Information and Personnel Information at Stations	68
5.3.9	Operator Control and Display of Passenger and Personnel Information in Stations ...	70
5.3.10	Passenger Information in Trains	70
5.3.11	Actual Service Gap	71
5.3.12	Reasons for Service Gap	72
5.3.13	Current Headway Deviation	72
5.3.14	Controlling Train Speed	72
5.3.15	Control in "Dark Territories"	73
5.3.16	Managing Work Sites	74
5.3.17	Links to Other Modes of Transport or Individual Transport	75
5.3.18	Distributed Operations Control Centres	76
5.4	Dispatching Intervention in the Automatic Route Setting Function – a Summary	76
5.5	Interfaces	78
5.6	Typical Work in an Operations Control Centre	78
5.6.1	Traffic Observation	78
5.6.2	Traffic Control	79
5.6.3	Observing Passenger Information	79
5.6.4	Corrections or Initiation of Passenger Information	80
5.6.5	Fleet and Train Crew Management	80

1 What is an Operu

5.7	Summary	80
6	Planning Centre	81
6.1	Basic Functionality	85
6.1.1	Input Forms in the Planning Centre	85
6.1.2	Time/Distance Diagram in the Planning Centre	86
6.1.3	Timetable Management System in a Planning Centre	87
6.1.4	Timetable Design System	88
6.1.5	Journey Time Computation	89
6.2	Possible Extensions	89
6.2.1	Connection Diagram in the Planning Centre	89
6.2.2	Planning of Access Restrictions and Speed Restriction Sections	90
6.2.3	Fleet and Train Crew Planning in the Planning Centre	91
6.2.4	Conflict Recognition in the Planning Centre	91
6.2.5	Empty Stock Distribution in Freight Transport	91
6.2.6	Operating Simulation	92
6.3	Interfaces	92
6.4	Typical Work in a Planning Centre	93
6.4.1	Routing	93
6.4.2	Fleet and Train Crew Planning	93
6.5	Summary	93
7	Dispatching Centre	94
7.1	Functions Shared with the Operations Control Centre and Planning Centre	97
7.2	Basic Functionality	99
7.2.1	Screen Forms in the Dispatching Centre	99
7.2.2	Train Position View (Delay View, Headway View)	99
7.2.3	Time/Distance Diagram in the Dispatching Centre	99
7.2.4	Connection Diagram in the Dispatching Centre	100
7.2.5	Geographical View	100
7.2.6	Timetable Management System in a Dispatching Centre	101
7.2.7	Train Run Forecasting	101
7.2.8	Conflict Recognition at the Dispatching Centre	102
7.2.9	Manual Conflict Resolution	103
7.3	Possible Extensions	103
7.3.1	Creation and Cancellation of Speed Restriction Sections	103
7.3.2	Interoperation with the Dispatching System in a Marshalling Yard	104
7.3.3	Vehicle Position Information Supplied by Radio	104
7.3.4	Vehicle Position Information Supplied by Trackside Reading Devices	105
7.3.5	Locomotive, Wagon, Freight and Train Crew Dispatching	106
7.4	Typical Work in a Dispatching Centre	106
7.4.1	Traffic Observation	106
7.4.2	Route Dispatching	107
7.4.3	Vehicle and Train Crew Dispatching	107
7.4.4	Passenger Information.....	107
7.4.5	Documentation.....	107
7.5	Summary	107

8	Operations Management Centre	109
8.1	Functions Shared with the Operations Control Centre and Dispatching Centre	113
8.2	Possible Extensions	113
8.2.1	Platform Track Allocation Diagram	113
8.2.2	Automatic Conflict Resolution in an Operations Management Centre	114
8.2.3	Interlocking Control in the Time/Distance Diagram	115
8.2.4	Debunching	116
8.2.5	Conflict Resolution Rules in a Rule-based System	117
8.2.6	Vehicle Control and Information	117
8.3	Typical Work in an Operations Management Centre	118
8.3.1	Traffic Observation	118
8.3.2	Traffic Control	118
8.3.3	Documentation	118
8.4	Summary	118
9	Integrated Functions	119
9.1	Integrated Display of Traction Power States	119
9.2	Integrated Display and Operator Control of Other Trackside Monitoring Facilities	119
9.3	Integrated Planning and Monitoring of Maintenance and Troubleshooting ..	120
9.4	Integrated Operator Control of Radio and Telephone	121
9.5	Integrated Operator Control and Display of Video Cameras and Video Monitors	121
9.6	Management and Integrated Control of Infrastructure	122
9.7	Mail Function	122
9.8	Integrated Word Processing Function	122
9.9	Summary	122
10	Common Functions	124
10.1	Archiving	124
10.2	Changing System Parameters	124
10.3	Common System Functions	125
10.4	Help Functions	125
10.5	Self-diagnostics	125
10.6	Diagnostic Programs	125
10.7	Multilingual Interface	125
10.8	Redundancy Functions	126
10.9	Various Fall-back Principles	127
10.10	Configuring System	128
10.11	Clock Synchronisation	128
10.12	Special Time Conditions	129
11	Off-line Systems	130
11.1	Playback	130
11.2	Interlocking Simulation	130
11.3	Train Run Simulation	131
